**Starting Up the System**

To start up the system, please select one of the following sources on the Crestron Touch Panel: **PC, Blu-Ray and Laptop**. The projector will turn on and the podium computer monitor will display the selected source. *

**VGA, HDMI and AUX cables are provided on the podium for laptop connections.** *

---

**Audio and Video Mute**

On the bottom right of the touch panel, you will see two icons for the audio/video mute. When the icon turns **Red**, the mute is active. Pressing the icon again will deactivate the mute function.

---

**System Shutdown**

On the lower left-hand side of the Crestron touch panel, you will see the **System Off** button. Doing this will shut down the projector and the Crestron touch panel will return to its default start-up menu.

---

This classroom is operated by Central Pool and supported by CETS staff. If you come into anyone complications with the technology or any other equipment in this room, please call CETS (215)-898-4707 or email **CETS@seas.upenn.edu** for further assistance.
